**Product name** | XW6200 Reconstructor/ AE computer  
Identification code(s) | 4522 132 4545x  
| 4522 132 4544x  
| 4522 132 5682x  
Total weight [kg] | 16 kg  
**Manufacturer** | Hewlett Packard  
Address | Orteliuslaan 1000  
Zip code | 3528 BD Utrecht  
Country | The Netherlands

| Printed Circuit Boards (PCB) two in the PSU with a surface greater than 10 square cm | Figure 2  
| Printed Circuit Boards (PCB) systemboard (motherboard) with a surface greater than 10 square cm | Figure 1  
| Printed Circuit Boards (PCB) maximal 6 add-in cards (PCI) with a surface greater than 10 square cm | Figure 3  
| Printed Circuit Boards (PCB) maximal 4 add-in cards (memory) with a surface greater than 10 square cm | Figure 1  
| Four attached to the power supply PCB cards. Electrolytic capacitors / condensers that measure greater than 2.5 cm in diameter or height | Figure 2  

**Fluids and gases**

Locations as mentioned in the Passport (Information in pictures)

*Place sketch(es) or photo(s) here, and indicate issues using icons:*

Remove the system battery. Press on the release tab of the battery holder. Rotate the battery beyond the latch and lift it straight up.

Remove the system board. Slide the board forward 1 to disengage the mounting standoffs from the chassis. Lift the board out of the chassis 2.

Ensure that all capacitors are safely discharged. Use a diagonal cutter to remove the desired components from both PCB cards. (Note that some components may need to be unsoldered if a diagonal cutter does not fit between the component and the PCB card.)
Remove the PCI retainer by pressing down on it, then out 1. Lift the PCI card out of the chassis 2.
