Philips ClearVue ultrasound family

Your versatile performer to depend on

Philips ClearVue ultrasound family
The Philips ClearVue ultrasound family brings together the advances that ultrasound professionals all over the world have said that they would most like to see in a high-value system. ClearVue is built from the ground up to deliver what’s important to you and your patients.

**Reliable from the start**
The sleek yet rugged design is built for the dependability that is essential in challenging environments. ClearVue performs for you day after day.

**The versatility your day demands**
The ClearVue family offers workflow enhancements and a range of capabilities across multiple clinical specialties, including general imaging, abdominal, vascular, musculoskeletal, small parts, Ob/Gyn, and cardiac.

**Performance from the inside out**
Every member of the ClearVue family shares an advanced processing platform for high volume rates in real-time scanning for excellent image quality. With significant advances in software, hardware, and applications compared to previous ClearVue generations, the ClearVue family is now more hardworking than ever.

**Scalable to protect your investment**
Not only is ClearVue easy to learn and use because of its intuitive interface for scanning, but it is also easily upgradeable with additional clinical features and transducers to allow your system to evolve with you over time.
ClearVue grows with you, protecting your investment. As your needs evolve, you can upgrade to new clinical capabilities with ease.

**ClearVue 350**  
Office-ready, and can grow with your needs

**ClearVue 550**  
Hardworking, for quick scans in busy settings

**ClearVue 650**  
Highly adaptable, with 3D/4D from the start

**ClearVue 850**  
Advanced capability, quantification, and ergonomics
ClearVue clinical excellence

ClearVue offers versatility across multiple clinical specialties, including general imaging, abdominal, vascular, musculoskeletal, small parts, OB, and cardiac.
The proof is in the images.

Thyroid gland

Testicular flow

Popliteal artery

Flow in common carotid artery and jugular vein

Umbilical artery

Trust in the Philips ultrasound legacy

We’ve created an innovative portfolio of ultrasound products by striving for change that improves and simplifies the lives of patients and healthcare providers worldwide. The ClearVue family with leading-edge technology and an intuitive design allows for quality healthcare that is now more accessible and affordable from a brand you can trust.
Every ClearVue system is light and compact, so you can easily maneuver it, with a smart, modular design for reliability and easy serviceability.
The ClearVue family features a comprehensive range of Active Array transducers to allow a wide range of scanning.

The sleek control panel is designed for intuitive use.

Speed image acquisition and management

Green for you and your community
Sustainability at Philips is all about improving the health and well-being of individuals and their communities. ClearVue systems are energy-efficient with low power consumption to help save on energy costs. The low heat dissipation is ideal in small rooms.
Staying on top of today’s complex and ever-changing healthcare environment is challenging enough. The last thing you need to worry about is keeping your care systems up and running smoothly.

Count on us
as your patients count on you

Always there, always on
We work as one with your team to keep your system running smoothly, seven days a week if needed.* We share your team’s dedication to solve issues before they happen, and the drive to keep going day and night until the job is done.

Remote Desktop
Where available, Remote Desktop allows for “virtual visits” to enhance technical and clinical support and to offer new options for training.

Remote Service Network
You can also connect your system to the Philips Remote Service Network and enter a support request directly from your ClearVue system, or generate a utilization report that provides data on key parameters to help you manage system use.

On-cart maintenance
On-cart software maintenance tools help optimize, maintain, and repair system software with ease while preserving custom annotations, calculations, presets, and patient data.

Understanding your needs, designed for you
Our flexible services and education offerings can be adapted to your needs in order to support your internal teams.

* Requires minimum RightFit contract. Conditions apply. Offerings are available in selected countries and for selected products only.
Sharing risk, increasing the return on your investment

Partner with us to maximize utilization and uptime of your system and ongoing investments. By teaming up with Philips to take care of your system, you can worry about what really matters — delivering better care, to more people, at lower cost. Together, we can create a healthier future.
