Brighten the way ahead

Delivering outstanding care for your patients – means confident diagnosis, excellent medical and patient care. The current pressure on managing healthcare spending requires you to work with less time, fewer resources and higher patient volume. An additional challenge is setting up an economically sound business with a low cost of ownership. The Philips Diamond Select program provides reliable refurbished imaging systems at an attractive price, so you can afford up-to-date technology and provide a wider variety of high-quality services to your patients, while supporting profitability.

Philips understands the clinical and economic realities you are facing and brings proven technologies from our most advanced ultrasound systems into the Diamond Select portfolio. You get access to excellent image quality, as you expect from a leader in premium ultrasound, for a more affordable price.

Testing and calibration

Versatility is yours

Quality and clinical functionality are important drivers that support your clinical diagnosis. We make sure you have access to advanced features and applications and you stay up to date. Managing your time is critical to your success. Therefore an optimized workflow within departments is necessary to increase efficiency. The interoperability of our systems helps you and your team to accelerate and to perform optimally.

Our portfolio enhances your ultrasound capabilities across a range of applications. With Diamond Select, you can choose from a wide portfolio of refurbished high-performance ultrasound systems, based on proven technology and supported by a partner that is truly interested in your success.

Demonstrating value far beyond its price

From the smallest to the largest clinical sites, you and your patient matter to us. Providing the highest quality care, both now and in the future, while at the same time keeping costs under control. By integrating preowned and new materials in the best possible combination we reach proven superb image quality in a high-performing, reliable system for a more affordable price.

A smart investment

All Diamond Select systems undergo a rigorous refurbishment process by expert Philips technicians. In our dedicated facilities, systems are put through stringent assessment procedures, testing and quality controls to meet our industry leading standards.

These tests cover key Ultrasound system components including beam former (and all other hardware), connectors, keyboard, monitor, retractable arms, touchscreen(s) and wheels. All applicable system performance tests are completed. Image quality is measured to meet or exceed original specifications. Full system diagnostics, boot cycle, reliability, safety and function tests are performed.

Each Ultrasound system meets OEM specifications and is rigorously tested for the performance you need to more easily expand into new clinical applications. These best in class products are refurbished via an ISO certified process and come with full serviceability, and a Philips warranty to enhance your ownership experience. As a result you get a highly efficient imaging system that provides years of service to you and your patients.

Keeping you up and running

Philips advanced service features and value added services boost productivity and promote uptime. Philips's world-class services, configured to meet your healthcare business needs in the Right fit program, are offered in combination with a Diamond Select system.

The value of a Philips ultrasound system extends far beyond technology. With the purchase of Philips Diamond Select system you get access to our award winning service organization, competitive financing, and educational programs that help you get the most out of your system.

Committed to your success

Trust in the Philips ultrasound legacy. We've created our innovative portfolio of ultrasound products by striving to improve patient care worldwide.
