

Accelerate the time from patient referral to treatment

IntelliSpace Radiation Oncology* is a protocol-driven and customizable patient management solution designed to accelerate time from referral of the patient to the start of their treatment by managing complexity, improving efficiency and enabling operational excellence.

Its intuitive dashboards, direct access to external applications and deep integration with hospital IT help you improve your daily workflows and keep a focus on your top priority: your patients.

Manage complexity by creating a harmonized way of working and transparent communications

- Optimize workflow through ProtocolCards that capture:
 - Physician intent
 - Tasks and their order
 - Application management
 - Task-related information
- Display user and department tasks on comprehensive, intuitive dashboards

Improve efficiency by deeply integrating applications, maintaining data integrity, and automating workflow

- Enjoy open, vendor agnostic, platform that automates data routing, executes tasks in the background, and launches contextually aware applications
- Benefit from interoperability with hospital IT environments (OIS, EMR, PACS, RIS/HIS, HL7, DICOM, LDAP, AD)
- Use single sign on (SSO) and easy navigation to key applications

Enable operational excellence by mitigating risk, documenting results, and discovering insights

- Validated, consistent, and tracked changes of patient data
- Discover actionable insights on performance and capacity (tracker, workflow analytics)
