This article is part of
Field Strength issue 38,
Summer 2009

PHILIPS

From NetForum – www.philips.com/netforum

With over 13,000 registrations the NetForum Communities are still growing. Within MRI NetForum, ExamCards are the most viewed documents. However, online training modules, web seminars and application tips are also very popular.

Benefit and contribute

Downloading an ExamCard from NetForum into your own scanner enables you to use an expert protocol without investing development time.

Most popular NetForum documents in first half of 2009:

1. ExamCard: 1.5T Non-CE renal/mesenteric MRA - Scottsdale Healthcare
2. Training module: Achieva R2.0
3. ExamCard: 1.5T Full length humerus with dual coils - Scottsdale Healthcare
4. ExamCard: 1.5T TRANCE lower legs
5. ExamCard: 1.5T Breast - University of Chicago

If you have developed an ExamCard that consistently provides good results, please share it on NetForum to help others add to their current practice. If you'd like to contribute an ExamCard or Clinical Case, please use the Contact form on NetForum or send an email to fieldstrength@philips.com.

Register to fully benefit

Registered viewers have access to more functionality and content, including ExamCard downloads, online training modules, more application tips, safety training modules and FAQ.
