Compact, flexible confidence

Philips IntelliVue MP5 patient monitor
The IntelliVue MP5 patient monitor delivers IntelliVue monitoring power and functionality in a compact and rugged housing to match the demands of a wide range of care environments both in and out of hospital. Each member of the IntelliVue family of networked patient monitors gives care teams clear information to assess patients and make confident decisions. All share an intuitive interface, innovative Clinical Decision Support tools, and outstanding design.

**Advanced features for ease of use**
The MP5 features an intuitive touchscreen and renowned ease of use, with industry-leading measurements, crisp and clear display, touchscreen operation, and one-step smart touch commands to allow you to focus on the patient, not the monitor.

Clinical Decision Support tools such as Horizon Trends, ST Map and ProtocolWatch reveal more information when it counts most, enhancing clinician confidence.

**Wired and wireless networking for continuous connection**
The IntelliVue MP5 connects to the IntelliVue Clinical Network, which can span the hospital enterprise. You can manage your patient’s care with the assurance that data collection won’t be disrupted, no matter where patients are located on the network.

**Expanded capabilities**
Enhance the compact IntelliVue MP5 by connecting it to an IntelliVue XDS Large Display, adding a high-resolution bedside display to make it easier to clearly see vital patient information at a distance. XDS remote-control functionality gives you the flexibility to access and control the IntelliVue MP5 wherever and however you choose to optimize your workspace ergonomics.

* Non-ECG option available in the US only.
** GS compatibility in the US only.
*** With basic monitoring configuration (automatic brightness reduction, ECG/RESP and SpO2 measurements in use, NBP every 15 minutes).
Commonly required measurements, built in
- ECG, SpO₂, and NBP available as standard.
- Non-ECG option also available.
- Choice of up to two invasive pressures and temperatures (with an optional port for Welch Allyn SureTemp®).

Comprehensive CO₂/gas monitoring
- Choice of mainstream, sidestream or Microstream® CO₂.
- Anesthesia monitoring with IntelliVue G1 and G5® anesthetic gas modules.

Comfortable handle and bedrail mount for transport.

Touchscreen operation designed for easy information input and intuitive onscreen navigation with one-touch commands.

Telemetry as a parameter (TAAP) and wireless telemetry as a parameter (WTAAP) display telemetry data through a direct or wireless connection to a telemetry transceiver. Wireless telemetry expands capabilities to provide untethered in-room access to telemetry data in near-realtime.

Video out allows use of larger external display.

Optional integrated recorder with 5cm (2”) strip offers convenient documentation where needed.

Lightweight at approximately 4 kg (8.8 lbs.) including battery.

No user setup required for typical use. A range of screen configurations are included.

21.3 cm (8.4”) color SVGA display with up to 4 waveforms is bright and easy to read.

Up to four hours battery operation with one lithium ion battery.

Sturdy housing (Class 7M3) to withstand rough handling.

Wired and wireless connectivity with easy switching between modes.
Clear confidence, in or out of the hospital

Optional bed rail hanger fits securely and provides a good viewing angle.

Philips offers a wide range of supplies, including NIBP cuffs, SpO₂ sensors, Microstream® CO₂ accessories and a variety of cables and leads to meet your needs.
