Seamless information workflow

Philips IntelliVue MMS X2
Trust Philips to lighten the load when it comes to patient transport. At just 2.7 lbs (1.2 Kg), the IntelliVue MMS X2 is designed to push the boundaries of what you thought possible. It’s small in size and large in capability, offering truly continuous transport across all levels of patient monitoring. Just a single step allows you to unplug and go. IntelliVue MMS X2 is a transport monitor that’s also a measurement module, with the clarity of exclusive integrated Clinical Decision Support features that help make it extremely easy to focus on the patient at every point. Trust Philips, a worldwide leader in patient monitoring, to bring you the advances that matter day to day.
solution
you someplace entirely new
Continuous across the

Provides comprehensive transport monitoring, including options for invasive pressure or CO₂, helping clinicians to immediately focus on the patient in every setting.

Small enough to go anywhere.

Powerful enough to go everywhere.

Connects to Intellivue patient monitors for continuous capture of pre-operative patient data and settings.

Flexible enough to be used as an induction monitor as well as a transport monitor.
Extremely light yet rugged
IntelliVue MMS X2 is one of the lightest, smallest, and most rugged advanced transport monitors available (at just 2.7 lbs, 1.2 Kg).

Extremely easy to use
Features the intuitive IntelliVue colorful and clear touch screen with 3.5” display, as well as accurate electronic recording. Just plug and play to transport to other IntelliVue monitors.

Extremely flexible
Connect to an IntelliVue XDS Large Display to transform the compact IntelliVue MMS X2 into a versatile standalone monitor with the same outstanding screen flexibility available in high-acuity IntelliVue monitors. XDS remote-control functionality gives you the flexibility to access and control the IntelliVue MMS X2 wherever and however you choose to optimize your workspace ergonomics.

Extremely effective in transport
Now getting from Point A to point B is as easy as 1, 2, 3 with a fast and simple way to transport a patient. In or out of the hospital, it’s just one step to unplug and go. An MMS with a display, alarm capability, battery and extended trends, IntelliVue MMS X2 is part of a fully integrated hospital transport solution and features a 3-hour removable battery.*

Extremely effective for patient mobility
So compact, it’s easily carried by patients in low-acuity settings, allowing patients the freedom to roam, and the clinician the freedom to provide high quality of care. The wireless telemetry parameter expands capabilities to provide untethered in-room access to telemetry data in near-real time.

Extremely sustainable
IntelliVue MMS X2 is also a Philips Green Flagship product, meeting rigorous environmental standards in manufacturing and use.

* The 3-hour battery based on these conditions: basic alarming, one new and fully charged battery automatic brightness reduction, ECG/Resp and SpO2 in use, NBP every 15 minutes.
No matter where they go, IntelliVue MMS X2 goes too

The IntelliVue MMS X2: the center of smooth workflow

Continuity of data everywhere
ER, OR, ICU, intermediate care... now it’s easier to focus on the patient with this transport monitor and MMS module in one. IntelliVue MMS X2 gives you clear information to make the best decisions for patients moment to moment.
Provides both derived and diagnostic 12-lead ECG measurements.

Advanced Horizon Trends feature focuses on deviations from baseline to give a more accurate clinical picture at a glance.

Proprietary ST Map gives a graphical display of ST segment data to quickly view perfusion changes.

Access trending up to 48 hours in 5-minute resolution or 24 hours in 1-minute resolution. Graphical trends are also available on screen.

Immediately view important data, even from a distance.

Three-waveform display captures important information for display to support quick, clear decision-making.
IntelliVue MMS X2 takes your patients anywhere they need to go

IntelliVue MMS X2 features an intuitive touchscreen with configurable SmartKeys.

The basic monitor weighs just 1.2kg (2.7 lb).

Just plug and play to transport to other IntelliVue monitors.

IntelliVue MMS X2 with IntelliVue XDS Large Display.
