

Simplicity is economy solutions in cardiac and vascular X-ray

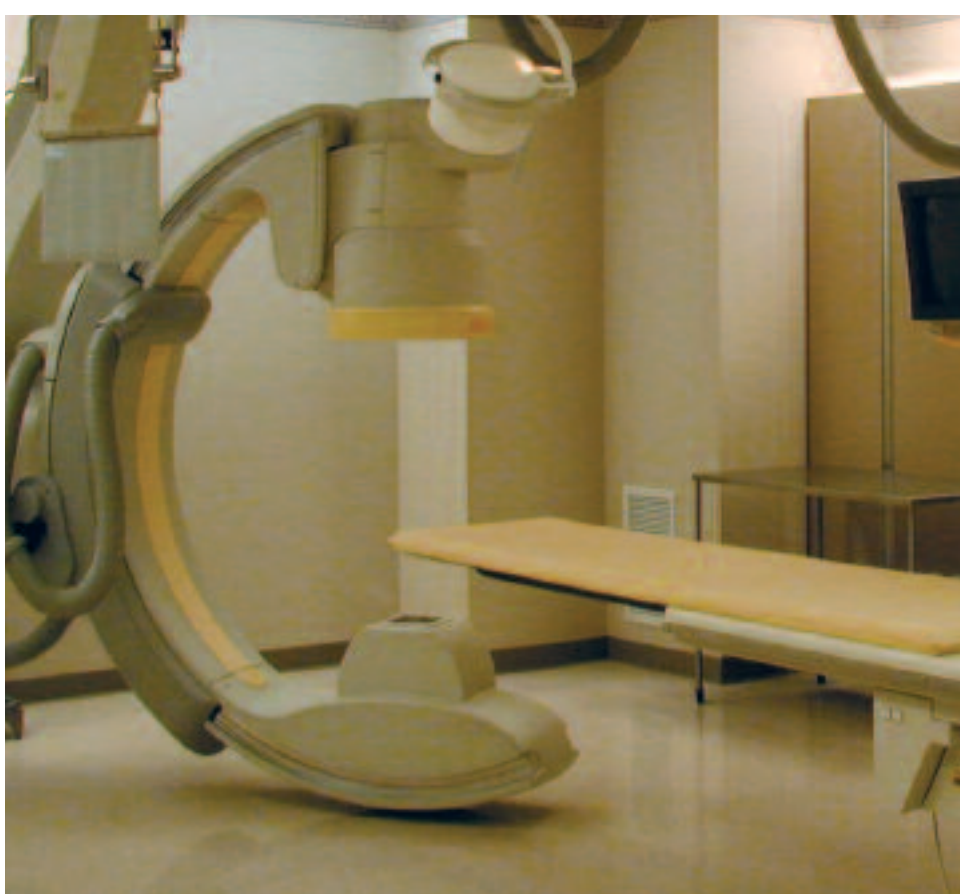

MidMichigan Medical Center – Midland Midland, Michigan

Challenge

The existing lab was not able to accommodate the rapidly growing number of interventional procedures, making the need for a second interventional radiology lab apparent.

Solution

Philips Diamond Select provided us with the right solution to our unique situation. It was just the right combination of exceptional value, superb image quality, professional service and the full one-year warranty.

Results

“We are extremely happy with our refurbished angiography suite from Philips Diamond Select. With major wearable parts replaced with new ones – new image intensifier, new X-ray tube, new glassware – and coupled with the full one-year warranty, it has been like buying essentially a new system. Our radiologists love the image quality; our patients’ satisfaction has skyrocketed as a result of the improved experience and additional services we have been able to provide them with, thanks to the exceptional value and quality of the Philips overall solution. It all just makes sense.”
