1. Pre-Treatment Cleaning
   - **Caution**
   - Follow all instructions from the manufacturer of the pre-treatment products. Any deviation from these instructions may impact the performance of the product. Review all applicable instructions for additional warnings and cautions.
     - Disassemble the mask according to the Instructions for Use included with the product.
     - Clean the mask using a soft bristle brush to adequately remove adhering substances from each component while soaking in a commercially available, anionic detergent (Examples: MEDIZIME LF, ANIOSYME DD1†). Extra attention should be given to the crevices and cavities during cleaning.
     - If compatible with the manufacturers instructions, the detergent may be applied within the washer/disinfection cycle.
     - Rinse the mask with 5 liters of water and air dry out of direct sunlight.

2. High-Level Disinfection
   - The recommended disinfection methods are identified by mask product (above chart) and approved (☑) for use on the mask and/or mask parts. Review the notes (☑) section for exceptions or deviations.
   - **Caution**
   - Follow all instructions from the manufacturer of the disinfection products. Any deviation from the manufacturer’s instructions or use of agents other than those listed in this guide may impact the performance or durability of the product. Review all applicable instructions for additional warnings and cautions.
   - **Warnings**
   - **Before Disinfection**
     - The fabric materials (eg: headgear, straps) cannot be disinfected using the methods listed. The fabric materials must be replaced before multi-patient use.
     - Masks with port caps: Open or remove the port cap prior to disinfecting the mask.
After Disinfection

- Inspect all parts for damage or wear; replace any parts that have visibly deteriorated (cracking, crazing, tears, etc.)
- Rinse thoroughly with water and air dry out of direct sunlight. Make sure the mask is dry before use.
- Verify the entrainment valve functions correctly, as outlined in the Instructions for Use included with the product.

Note

- After disinfection, discoloration and a slight odor is normal.
- † Anioxyde 1000, Aniosyme DD1, and Gigasept FF are not available for use in the United States.
- † † For international use only. The PerforMax Pediatric is not available in the United States

Chemical Agent Active Ingredients

- Cidex - 2.4% glutaraldehyde
- Cidex OPA - 0.55% ortho-phthalaldehyde
- Wavicide - 2.65% glutaraldehyde
- Control III - 10% alkyl dimethyl benzyl ammonium chloride, 10% alkyl dimethyl ethyl benzyl ammonium chloride
- Anioxyde 1000 - 0.15% peracetic acid
- Gigasept FF - 11.0 g succindialdehyde, 3.0 g dimethoxytetrahydrofuran
