Responder CPR/AED Training and Implementation Programs

Program overview and specifications

Prepare your first responders with complete emergency care training

Philips HeartStart Defibrillators are only a part of a complete solution for an effective early defibrillation program. Responder training is vital to the success of these programs. That’s why Philips has teamed with Medic First Aid International, Inc., a nationally recognized training organization, to provide Responder CPR/AED Training. Responder training is a key component of HeartStart Essentials, a comprehensive suite of early defibrillation program solutions.

Training through Medic First Aid is cost-effective, hassle-free and flexible. Course offerings include:

- Initial training
- Specialized supplemental courses
- Student and instructor certification
- CD-ROM and Web-based refresher courses
Medic First Aid Responder Training

Product 861280

Philips HeartStart Essentials
- The key to a successful early defibrillation program

Philips helps implement a comprehensive program with virtually everything you and your medical director will need to help save a life from sudden cardiac arrest. We’ll get you started with pre-implementation consulting and site assessments. We can manage your everyday needs including medical direction from a licensed physician, web-based program management, data management software, and responder and instructor training. Philips offers ongoing support with a five-year warranty, optional extended warranty, and continued customer support from supplies ordering to technical assistance.
