

# Allura FD20 FlexMove with AD7 Table

## Preferred Room Layout

The layout shown below is based upon a typical equipment configuration and should be considered as a general design guideline. Site conditions, application requirements, customer preferences, and/or equipment configuration may significantly impact suite design and equipment layout. It is recommended to request site-specific drawings from a Philips representative early in the design process.

## Equipment Layout

Required Unistrut Height: 10' - 2 3/8", +0" / -3/8" (3110mm, +0mm / -10mm)

Ceiling Unistrut measured from finished floor to bottom of Unistrut.

## Environmental Requirements for General Equipment Locations

Heating, ventilation, air conditioning requirement for general equipment locations must maintain temperature at  $72^{\circ} \pm 5^{\circ}$  Fahrenheit ( $22^{\circ} \pm 3^{\circ}$  Celsius) and non-condensing relative humidity at 20% - 80% with 10% max. variation.

Equipment's designed airflow is from bottom to top and front to back. Please design the air handling in the rack cabinet equipment area accordingly.

## Power Requirements

Mains 40E Cabinet

Power Output:	100kW
Supply Configuration:	3 phase, 3 wire power and ground, delta
Nominal Line Voltage:	480 VAC, 60 Hz
Branch Power Requirement:	225 kVA
Circuit Breaker:	3 phase, 125 A

## Remote Service Diagnostics

Medical imaging equipment to be installed by Philips Medical is equipped with a service diagnostic feature which allows for remote and on site service diagnostics. To establish this feature, a RJ45 type ethernet 10/100/1000 Mbit network connector must be installed as shown on plan. Access to customer's network via their remote access server is needed for Remote Service Network (RSN) connectivity. All cost with this feature are the responsibility of the customer.
